

## PRESS INFORMATION

21. June 2022

### **embedded world 2022: Three days of information, ideas and innovation**

- **More than 720 exhibitors from 39 countries**
- **6 exhibition halls and over 20,000 m<sup>2</sup> of exhibition space**
- **High-caliber conferences, expert panels and an exhibitor forum to round off the program**

**International experts meet for the 20th holding of the embedded world Exhibition&Conference in Nuremberg from June 21-23, 2022. The latest trends and technical innovations in the field of embedded system development will again be presented in Halls 1, 2, 3A, 4, 4A and 5. 724 exhibitors from 39 countries create a unique information forum for the embedded industry over more than 20,000 m<sup>2</sup>. The embedded world Conference takes place in Hall 6 while the electronic displays Conference is located in NCC Mitte.**

"I am delighted that we can all meet again live in Nuremberg after the virtual embedded world of 2021. Along with the embedded world Conference and the electronic displays Conference, the motto of this year's exhibition is therefore 'reunited'. Trade visitors from all over the world can again look forward to a high-quality exhibition with many innovative products. Topics such as hardware, systems, distribution, services, tools, application software, the safety & security Area, the IC&IP Design Area, as well as an electronic displays Area, an embedded vision Area and a M2M Area await visitors in the halls, and also as part of the technical program," reveals Benedikt Weyerer, Exhibition Director embedded world at NürnbergMesse. "I am pleased that with embedded world we will once again become the community meeting place for the global embedded industry. The success of embedded world also comes from the fact that we directly identify, embrace and help shape new trends and developments from the embedded community. This can be witnessed either in the event, as a special

presentation or as a top-class discussion panel in the forums which take place right at the heart of the show," continues Benedikt Weyerer.

### **Presentation of the embedded award**

Today, on the first day of embedded world, at 12 noon, the coveted embedded award will be presented in Exhibitor Forum 1 to the winners in each category by Prof. Dr.-Ing. Axel Sikora, Offenburg University of Applied Sciences & Hahn-Schickard and Chairman of the embedded world Conference, along with Peter Ottmann, Managing Director of NürnbergMesse, and Matthäus Hose, Managing Director of WEKA Fachmedien in the exhibitor forum. For the 18th time in succession, the awards ceremony will take place during the press tour. Awards are presented in the categories Embedded Vision, Hardware, Software, Safety & Security, Tools and Start-up to companies which have made outstanding contributions to development technology and submitted innovative products.

The list of nominees can be found here:

### **embedded world Conference and electronic displays Conference**

The Internet-of-Things, wired and wireless data transmission, hardware, operating systems, software and systems engineering, autonomous systems, safety and security, system-on-chip design, embedded vision or human-machine interface: the thematic spectrum and the knowledge input of the embedded world Conference, over three days, is huge.

"The embedded world Conference is THE meeting place for the embedded community. All the latest and future-oriented trends are presented here. The thematic range of the embedded world Conference is becoming wider every year, which in turn presents developers with ever greater challenges. But it is gratifying to see how experienced developers come together every year in Nuremberg to share their knowledge and help others to turn ideas and innovations into real products," explains Prof. Dr.-Ing. Axel Sikora, Offenburg University of Applied Sciences & Hahn-Schickard and Chairman of the embedded world Conference.

You can find more information regarding Keynotes, Sessions and Classes here: [www.embedded-world.eu](http://www.embedded-world.eu)

Prof. Dr. Karlheinz Blankenbach, Pforzheim University and Chairman of the Conference Advisory Board, also stresses, "Two days filled with innovation and networking at the highest level - that is the electronic displays Conference. I am delighted to see international experts coming together again in Nuremberg to exchange ideas at the most important European B2B platform for display technologies. Innovations will be presented and new projects launched at a high professional level."

The electronic displays Conference will once again offer a wide range of technical presentations on various topics such as touch technologies and innovations, display uniformity & testing, display systems, display measurements, micro-LEDs and other display technologies, gesture control, augmented and virtual reality, display manufacturing and materials, automotive displays, as well as HMI and GUI concepts, and will provide a space for international participants to exchange technical ideas.
